About HDD Manager	22

## DC Series DVD/CD Duplicator - Introduction

The DC Series CD/DVD Duplicator is a revolutionary solution that will allow you to link up to 255 fifteen target towers for a maximum of 3825 targets simultaneously. Duplication can be made from a single master DVD/CD ROM or Hard Drive. The ability to reconfigure the towers to form smaller chains or select standalone mode gives you the ultimate flexibility.

The easy-to-use operating control panel consists of an LCD screen and 4 control buttons. All operating information, such as the function list, instructions, operating status, or error message(s), is displayed in real time on the screen.

The built-in Hard Drive allows users to load multiple DVD/CD Master Source Discs onto the HDD as source disc images. This reduces the risk of damaging the Source Disc that result from heavy duplicating jobs. A powerful HDD management system dynamically assigns HDD partitions to each DVD/CD disc image loaded onto the HDD accordingly. This ideal HDD manager will ensure a flexible and efficient HDD management process.

#### **Features**

- Up to 15 Target DC Series Duplicator
- 2 x16 LCD display and 4 control buttons.

#### **Control Buttons**

There are 4 control buttons: ▲, ▼, ENT ESC

A: used to navigate up in the menu.

v: used to navigate down in the menu.

ENT : Enter, Execute the function

ESC: Escape, used to cancel or go back to previous function

- Supports up to max 52x CD duplication, 24x DVD duplication
- Offers flexibility in setting different duplication speeds depending on Disc writers
- Easy to select Drive as the Master Reading Source
- Support for a Hard Drive Device. Source CD or DVD disc can be loaded onto the Hard Drive as disc images
- Customizable naming for disc images stored on hard drive
- Support for Audio Track editing. Combine audio tracks into one customized CD
- Special Pre-Scan feature evaluates master source disc before copying
- Support System Startup Password Protection to prevent unauthorized usage
- Support Setup Password Protection protects custom settings on duplicating systems
- Prevents failures caused by defective blank discs or damaged source discs
- Support for Verification function ensures copied disc's readability
- Support Counter Function, all major disc types, Auto detect source disc.
- Prevents failures due to defective master disc by allow mid burn continuation.
- Allows reconfiguration of the towers for standalone or to form smaller chains depending on duplication job.
- Firmware is easily upgradeable. The controller's firmware can be automatically updated to individual towers or to linked towers.
- Firmware can be synchronized between linked towers as additional towers are added to the chain.

## **Specification**

Model	Max Burn	Max Burn	Buffer Memory	Total Targets
	CD SPEED	DVD SPEED	Size	per Tower
DC SERIES	52X	24X	256MB/512MB	7, 10 or 15

Power	Voltage:	115v/230v
Environment	Working Temperature	0C~75C (32F ~ 167F)
	Storage Temperature	-20 C~85 C (-4F ~ 185F)
Humidity	Working Humidity	20%~80%
	Storage Humidity	5%~95%
Dimension	Length	16 inches
	Height	9 inches
	Width	24 inches

Warning, each tower will draw approximately 4 amps from its power source. Please insure that the electrical system has sufficient amperage to support multiple towers on the same circuit.

#### Content of the box

DC Series Duplicator (1) RJ45 link Cable (1) Power Cable (1) User Manual (1) Quick Start Guide (1)

**IMPORTANT**: We highly recommend keeping all your original packing material for your DC Series Duplicator in the event that the unit may ever need to be sent in for service.

## Installation and Setup Guide

#### Step 1

Connect the green end of the RJ45 link cable to the master port (1st port) of the duplication tower.

## Step 2

Connect the blue end of the RJ45 link cable to the slave port (2<sup>nd</sup> port) of the next duplication tower.

<u>Step 3</u>
If more towers are present, repeat Step 1 & 2 as necessary.

#### Step 4 - Set Link Position

Select 12. Link Setup
Press ENT
At 1. Set MyPosition
Press ENT
For Tower 1 Select 'First'
For Tower 2 Select 'Middle'
For last Tower Select 'Last'
Press ENT
Press ESC
Power OFF the Towers

Note: Additional towers that are between the first and last tower in the chain should be set to 'middle'

## Step 5

Power ON the Duplication Towers. The screen will show the total number of drives detected

Next it will display the number of towers detected

At 1. Copy, the unit is ready for use

12.7	HDD Info.	Checks the information in HDD, such as the number of discs stored on the HDD and the amount of space left in the HDD
12.8	Format HDD	This feature will allow you to format the HDD. However, if HDD image was selected as the source you will not be able to format it.
13.	Link Setup	
13.1	Set MyPosition	This function sets the position of the tower within the chain.
13.2	Start Link	Executes the linking process.
13.3	Update BIOS	Upgrades the controller firmware to all linked towers.
13.4	Synchron-BIOS	Synchronizes the controller firmware of all linked towers to the firmware of the first tower.

#### **Operation Guide**

#### 1. COPY DISC

The following operation shows how to copy a Master Reading Source to a blank DVD/CD disc. If you would like to make Disc-to-Disc copies simply ensure that the Master Reading Source is set as the READER

- a.Turn on the duplicator before you start copying and ensure that the correct reading source and blank disks have been set.
- b.The system will automatically display how many blank discs were detected.
- c. When the system is ready to copy, press **ENT** to execute DVD/CD copies.
- d. When the system starts the copying process, it will start loading the disc. It will then analyze the discs, and then start copying. During the copying process, the LCD screen will display the Master Source Disc's data size and copying progress.
- e. When the copying is finished, the Writer Trays will automatically eject.
- → Press **ENT** to load disc and execute copying
- → Analyzing source disc
- → Start Copying
- ightarrow Finished and Eject discs

2. TEST COPY DISC

Note 2: If your duplicator has a HDD installed and if you would like to make Hard Drive-to-Disc copies, please refer to 12.1.1 HDD Image Manger for more information

## a. Their four ation

- a. This function is a simulation of the COPY process. The process is similar to the COPY function, with the exception of the writing on the recordable disks.
- b.Press♠ or ▼ to navigate the function menu to 2. Test and press ENT
  - c.The system will auto detect the numbers of blank disc and start to simulate the COPY process. However, there is no data that will be written onto the blank disc.
  - d. The purpose of this process is to ensure an error free duplication.
  - → Press ENT to load disc and execute copying simulation
  - → Analyzing source disc
  - → Start Simulation
  - → Finished and Eject discs

1. Copy 79:45 7 discs detected

Copy 79:45 Loading Disc

Copy 79:45 Analyze Disc...

2. Test 79:457 discs detected

Copy 79:45 Analyze Disc...

Test 79:45 Loading Disc

Test 79:45 Analyze Disc...

#### 3. COPY & VERIFY

This operation will start the copying process, and will be followed by a Verification process to ensure data's reliability. Therefore, the duplicator will not eject discs until verification is complete.

- a.This operation will copy the Master Source onto Blank DVD/CD discs. Before the use this function, ensure
- b. The correct reading source and blank discs have been set.

3.Copy & Verify 7 discs detected

Copy & Verify Loadina Disc

Copy & Verify 79:45 Analyze Disc...

Copy 79:45 10% 08:00

79:45 Verify 45% 35:45

c. The system will automatically display how many blank discs were detected. d. When the system is ready to copy, press **ENT** to execute DVD/CD copying.

When the system starts the copying process, it will start loading the disk. It will then analyze the disks, and then start copying. During the copying process, the LCD screen will display the Master Source Disc's data size and copying progress.

- e. When finished, the system will continue a verification to make a disc Readability
- f. When the verification is complete, the Writer Trays will automatically eject the completed discs.
- → Analyzing source
- → Analyzing source disc
- → Start Copying
- → Copying finished and start verification
- → 100%finished and Eject discs

Use verification to make a Disc Readability Check. This operation will check the master disc and the copied discs' readability to make sure all of the copies are readable.

#### 4. COPY & COMPARE

This operation will start the copying process, and then it will continue with a Comparison process to ensure data correctness. Therefore, the duplicator will not eject discs until a disc Comparison is complete.

- a.This operation will directly copy the Master Source onto a blank DVD/CD disc. Before this operation, you have to put the correct reading source and blank discs.
- b.The system will automatically display how many blank discs are detected.
- c. When the system is ready to copy, just place **ENT** to execute DVD/CD copies.
- d. When the system starts the copying process, it will start loading the disk. It will then analyze the disks, and then start copying. During the copying process, the LCD screen will display the Master Source Disc's data size and copying progress.
- e. When finished, the system will continue with the Comparison process to ensure the discs are exact copies of the master source.
- f. When the Comparison is finished, the Writer Trays will eject the discs.
- → Press **ENT** to load discs
- → Analyzing source disc
- →Start copying
- →Copying finished
- → Start Comparison
- →100% finished and Eject discs

4.Copy & Compare 7 discs detected

Copy & Compare Loading Disc

Copy & Compare 79:45 Analyze Disc...

Copy 79:45 10% 08:00

79:45 Compare 45% 35:45

- The Compare Disc function serves as a bit-by-bit Comparison between Master Reading Source and the copied discs inside the writer trays. This operation ensures that all of the copies are completely identical to the Master
- Reading Source.

#### 5. VERIFY

5. Verify7 discs detected

This function will check the master disc and the copied discs' readability to ensure that all of the copies are readable.

5. Verify 79:45 Loading Disc a. Place master source disc and all copied discs into the duplicator,

Press **ENT**. The duplicator will automatically start loading the disc, analyze the source disc and start verification.

b. When verification is complete, the duplicator writer trays will automatically eject.

→ Press **ENT** to load discs

- → Analyzing source disc
- →Start verification
- →100%Finished and eject discs

Verify 79:45 Analyze Disc...

## 6. COMPARE DISC

Verify 79:45 45% 35:45

Use this function to make a **bit-by-bit Comparison** between Master Reading Source and the copied discs inside the writer tray. This operation is used to ensure all of the copies have the same information as the Master Reading Source.

6. Compare7 discs detected

a.Put master source disc and all copied discs into the duplicator,

Compare 79:45 Loading Disc b.Press **ENT**. The duplicator will automatically start loading the disc, analyze the source disc and start the Comparison function.

Compare 79:45 Analyze Disc c. When the Comparison is finished, the duplicator writer trays will automatically eject.
→ Press ENT to load discs

→ Analyzing source disc

→Start Comparison

→100%Finished and eject disc

• Note: You can ONLY use the compare function when duplicating DATA discs

Compare 79:45 45% 35:45

#### 7. SELECT BURN SPEED

This operation allows you to adjust and **select the Duplication Speed** for the three different disc types: CD, Audio CD, and DVD.

7.Set Burn Speed

a.Press either button ♠, ▼ to navigate the menu. <u>7. SELECT SPEED</u>, and press ENT b. You will see three disc types: CD, Audio CD, and DVD. Press either button ♠, ▼ to select a disc type and press ENT to confirm your selection. c.Press either button ♠, ▼ to select the burning speed.

Burn Speed CD = 52

→ Press ENT & use 🗚 🔽 to set the data CD burning speed

Burn Speed Audio CD = 40

Burn Speed DVD = 8

- → Press ENT & use A, V to set the Audio CD burning speed The recommended Audio burn speed is 40x.
- → Press ENT & use 🗚, 🗸 to set the DVD burning speed

Note: DVD burn speed setting is only available on DVD duplicators

8. Select Source Set an Optical Drive or Hard Drive Disk as the Master Reading Source.

8. SELECT SOURCE

Source Drive ==>

HDD: ST380021A

Source Drive ==>

D#1: dvd-rom

a. Move to 8. Select Source and press ENT. b.Press A, v to select either a HDD or an Optical Drive with assigned number as the reading source.

- → Press ENT
- →move 🖪, 🔽 to select
- → Press **ENT** to finished setting

Note: If HDD was selected as Source, then follow 12.1 Select Image 's instructions to be familiar with how to select image files as your reading source..

Note: Each Optical Drive will be assigned a Drive # according to their installation sequence. If there is then Drive#1 is automatically set as the Reading Source.

#### 9. AUDIO TRACK EDIT

This process will guide you on how to select audio tracks from various audio CDs and combine them into one customized Audio CD.

#### 9. Track Edit

#### 9.1 Select and Copy Track:

a.Move A, V to 9.Audio Track Edit menu.

b.Insert an Audio CD with music tracks in the Reading drive and Insert ONLY ONE Blank CD-R disc into one of the writers.

c.As soon as both audio CD and blank CD-R are recognized, the following message will appear "ready to press ENT" on duplicator LCD screen.

d. Navigate the menu by press  $\wedge$ ,  $\vee$  to find the desired track number and then press **ENT** to confirm the selection. Repeat the process to choose the tracks that will be copied to the disk. The letter "a, b, c, d..." will appear on top of each selected track.

→Press ENT

a b c 1234567

[Track Edit]

1. Copy Track

cde7 8 9 10 ok

Track 02 06:14 Copy...... 03:14

- → move A, v and press ENT to select tracks
- → Press ENT to start burning
- e. Once the tracks have been selected, press v to move cursor to the end of the "OK" display. And press **ENT** to confirm and submit your selection.
- f. Once you submit selection, "Copying Audio Tracks..." will appear on your LCD screen. It shows the track number, total number of the current track and the position that coping.

g. Once the Copying Audio Tracks process is complete, copied CD will be displayed. It shows total track on the CD, total time used and total time remain.

h. You will need to finalize, indicated on 9.2, before playing back. If you choose NOT to finalize, you can go back to the first step to continue the process. If you choose to finalize, please use "9.2 Close Disc".

Note: Once you finished copy Audio Track, you will NEED to perform "9.2 Close Disc" function for your audio CD. If you do not, your audio CD will NOT play.

Track Used 20:53 04 Free 59:25

## 9. Track Edit 9.2 Close Disc

Use this process to make a CD-R/CD-RW disc become a playable Audio CD.

- a. Select 9. Track Edit and press ENT
- b. Move to select 2. Close Disc and press ENT to start close disc process.
- c. When Close Disc is processing, you will see "o", "O" blinking on the screen.
- d. When the process is done, writer will automatically eject the disc, and you will see "\_" on the screen.
- →Press ENT
- →Close finished and eject disc

Track Edit

Clear All Count Complete!	→ press ESC to return to Copy Count menu

#### 11. SETUP

Use this function group to change the manufacturer's default setting.

#### 11.1 Power On Time

[Setup]

1. Power On Time

Power On Delay 15 seconds You can set the system warm up time from 5 sec to 255 sec after system power on.

- a. Select 11. Set Up and press ENT
- b. Select <u>1. Power On Time</u> and press <u>ENT</u>
  c. Press A, v to increase or decrease the seconds.
- →press ENT
- →press A, v to set seconds

#### 11.2 Auto Start

This operation allows the duplicator to automatically execute copying once source disc is placed in the master source drive and recordable discs in any of the writer trays. You can disable or turn on the auto start function with the time (1-99 seconds) it would take to activate this feature. To execute this function, you must set the operation mode from COPY, TEST, VERIFY, COMPARE, COPY & VERIFY, COPY&COMPARE to auto start copying.

- →press ENT
- →press A, v to set seconds
- Note: If you set the function off, the LCD screen will not show how many blank discs are detected in writer trays.

#### 12. IMAGE MANAGER (For Duplicator with HDD Installed)

This function shows how to perform various Hard Drive related operations. The system menu will not show this function if your duplicator does not have an HDD installed. Please refer to 14. ABOUT HDD MANAGER to get more information about the special function and advantages about this feature.

## 12.1 Select Image

This function shows how to select an Image file as a Source that can be copied to discs. This function is required when a copy is made from your HDD to blank discs. Please refer to 12.1.1 for instructions regarding how to make Hard Drive-to-Disc Copies.

- →press ENT
- → press 🔨 to select and press to ENT confirm

## 12.1.1 Make Hard Drive-to-Disc Copies

Make sure Hard Drive is set to Master Reading Source. When it is finished, select the image then HDD will automatically be set as the Reading Source.

- a. Return to the main menu and press the up or down buttons to select 1. Copy
- b. Insert blank discs into writer trays. (If there is a disc in the Reader tray, it will not be read) Press ENT to start copying. If 11.2 Auto Start, is selected when a blank disc is placed in any of the writer trays, the duplicator will automatically begin the copying process.
- c. When completed, trays will eject.
- Note: Once an HDD Image is selected, the HDD will automatically be set as the Reading Source. If you wish to make Disc –to- Disc Copies, you must go back to <u>8.</u> <u>Select Source</u> to select the DVD/CD-ROM as the Reading Source.

[Image Manager]

1. Select Image

[Select Image] A001 DVD 4469M

[Image Manager] 2. Disc => Image

[Disc = = > A001]446MB 10%

12.2 Disc => Image

This function shows you how to load the master source disc onto the Hard Drive and save it as an image file.

- a. Place Master Source Disc into any Drive,
- b. Select 12.2 Disc -> Image and press ENT
- → press ENT
- **→**100%

[Disc = = > A001]**Finished** 

• Note: The source disc can be placed in any Reader or any one of Writer Drive.

12.3 Reader Speed

When you wish to perform this function, 12,2 Disc -> Image, set the Reading Speed from the reading master source disc

• Note: this function is ONLY available when loading the Source Disc to an HDD

This function allows checking all information of HDD, such as how many discs are stored and the HDD's available space.

→ press ENT

Free: 41CD 8DVD

[Image Manager] 8. Format HDD

Caution: Format HDD?

[Format HDD] Confirm Again

[Format HDD] Complete!

12.8 Format HDD

This feature allows formatting the HDD. However, you will be unable to format the HDD if the HDD image was selected as Reading Source. You must go to 8. Select Source to select the Optical Drive as Reading Source.

→ press ENT

→ Press ENT to confirm format

→ Press ENT to confirm and start executing

#### 13. LINK SETUP

To access this menu use the 

until you arrived at 13. Link Setup, and then press ENT

Note: If no Hard Drive is present in the tower, this function will default to 12. Link Setup.

#### 13.1 Set MyPosition

[Link Setup]
1. Set MyPosition

[Link Position] == > First This function will allow you to set the position of the tower within the chain.

- a. Select 13. Link Setup and press ENT
- b. At 1.Set My Position and press ENT
- c. Press A. v to select between First Tower, Middle Tower, Last Tower, or Stand-alone.
- → Press ENT

#### 13.2 Start Link

[Link Setup] 2. Start Link

Start LINK .....

This function allows you to start the linking process. Linking process also automatically starts when the duplication towers are first power on.

- a.Select 13. Link Setup and press ENT press
- b. Select 2. Start Link and press ENT

#### 13.3 Update BIOS

[Link Setup] 3. Update BIOS This function allows you to upgrade the firmware of all the towers in the chain Note: It requires a firmware CD that contains .bin firmware file to work. Contact the duplicator manufacturer to obtain the update file.

- a.Select 13. Link Setup and press ENT press
- Upgrade BIOS b. Insert a certified firmware upgrade disc in the reader.
  - c. Select 3. <u>Update BIOS</u> and press ENT

# Waiting Disc .....

#### 13.4 Synchron-BIOS

[Link Setup]
4. Synchron-BIOS

This function allows you to synchronize the firmware version from the first tower to all the towers in the chain.

Note: It requires a firmware CD that contains .bin firmware file to work. Contact the duplicator manufacturer to obtain the update file.

- a.Select 13. Link Setup and press ENT press
- b. Select 4. Synchron-BIOS and press ENT
- c. Data will begin moving from the first tower to the subsequent towers.

## Move Data [02713]

#### 14. About HDD Manager

Our duplicator uses rational and dynamic HDD management technology. The traditional method of formatting an HDD requires you to choose the number of partitions designated for DVDs and CDs before formatting your hard drive. The problem is that you might not be able to predict how many DVDs or CDs you will load onto your hard drive. Many incomplete partitions can be created, mainly with new DVD disks constantly coming out, such as the double- layer DVD. You need an intelligent and more dynamic way to manage your HDD and our HDD manager can do that for you!

Our Dynamic HDD Manager consists of the following special features: I. Auto Detect Disc Capacity and Dynamically Assign Partitions

- 1. When you first format the built-in HDD, our duplicator will **automatically divide the HDD into 1GB partitions.** A DVD or CD partition does not have to be selected in the beginning.
- 2. You can check HDD information in function <u>12.6 HDD Info</u>. The Hard Drive's **capacity** is **presented in terms of how many DVD or CD discs** you can load. For example, if your built-in HDD is 40GB, then the system will show the HDD available capacity:
- → 5GB = 8
- → 40GB/ 1GB = 40
- Note: DVD is calculated by 5GB, and CD is calculated by 1GB.
- **3.** Every time a source disc is loaded, **the duplicator will auto detect the disc capacity and assign correct partitions for it.** For example, if you load a 4GB double-layer DVD disc into HDD as a disc image, the system will automatically detect and assign 4 partitions for it.
- **4. Dynamic calculated and display HDD capacity**. The duplicator will present built-in HDD capacity information dynamically depending on your loaded source disc's capacity.. Before loading a 4GB DVD disc as source disc image, the HDD information shows the HDD capacity that is available for loading **5 DVD or 26 CDs**. However, after loading a 4GB DVD, the system will **re-calculate** the total available partitions and display how many DVD or CD discs you can load as disc image the next time.
- → Before load 4GB DVD HDD info:

Note: DVD indicates 5GB partition and CD indicate 1GB partition

#### → After load 4GB DVD HDD info:

#### Smart Image File Management:

- 1. When Discs are loaded into HDD as stored disc images, the system will assign a file name to the image file beginning from A001~.
- Note: Each time a new disc image is loaded, the system will automatically search and assign the lowest number as the file name. For example, if there are no deleted files, the file name will be assigned in sequence beginning from A001. However, if there is a deleted file, such as A003, then the file name will be held. The next time there is a new disc image stored, the lowest number of A003 will be assigned as this new disc image's file name.
- 2. You are allowed to delete an image file by executing 12.5 delete image. Once an image file is deleted, the name of the file will be left empty and held for a future loaded image file. The existing file name will not be changed or moved ahead due to the deletion.
