

## **PRESS RELEASE FOR IMMEDIATE RELEASE**

### **ILY Enterprise, Inc. announces the release of “Drag & Drop” duplicator function**

**City of Industry, CA, July 25, 2013** – ILY Enterprise, Inc., introduces a new "Drag & Drop" function for the Spartan Pro Duplicator Series. This "Drag & Drop" function will directly load ISO image files from a PC onto the duplicator's hard drive (HDD) without using any special software. After the ISO image file is transferred to the duplicator's HDD, it can be used as a master source to start the duplication process. Any file or data on the PC to be duplicated has to be converted into an ISO image file first, then it can be loaded directly into the duplicator's HDD. This feature will save time and effort since creating a master disc is no longer required to start the duplication process. (The duplicator's HDD is linked to a PC via a USB 3.0 connection.)

“This new feature will help save time by loading files from a PC on to the duplicator's built-in hard drive” says Jeffrey Yao, CTO at ILY Enterprise, Inc. “Thanks to this innovative update, our customers can now make multiple copies without having to create a master disc.”
