

PRESS RELEASE FOR IMMEDIATE RELEASE

ILY Enterprise, Inc. announces it is now carrying EZ Dupe brand products with a 3 year warranty

City of Industry, CA - March 18, 2013 - ILY Enterprise, Inc. announces it is now carrying EZ Dupe brand products based on a mutual long term relationship and providing customers with a 3 year warranty on EZ Dupe products. All Spartan series duplicator systems will continue to maintain a one-year warranty. The EZ Dupe duplicator product lines include CD/DVD/Blu-ray/USB/SD/CF/HDD duplicators for multiple market segments. EZ Dupe duplicators are highly efficient duplicators that allow you to quickly copy photos, HD video and countless electronic files in minutes. These units are built and engineered to meet and exceed today's ever changing duplicator demands.

"The EZ Dupe product lines expand our presence in the duplicator market, and enhances our capabilities to offer our customers more options to meet the growing demands of today's duplicator market," said William Lee, Product Manager at ILY Enterprise, Inc.

One of the many exciting EZ Dupe product lines is the FlashMAX flash memory duplicators now with a new look and recent expansion to include three new products – the second generation FlashMAX USB duplicator, the FlashMAX SD duplicator and the FlashMAX CF duplicator. These flash duplicators easily and reliably create multiple copies of your USB, SD (MiniSD/MicroSD with adapter), and CF flash media without a computer or software. Each channel has dedicated copy throughput of 2GB per min.

Features:

- Asynchronous copy mode allows each channel to function independently and copies directly from built-in memory so there is no need to interrupt a copy cycle as each channel will load, unload and copy independently.
- Source Analysis feature identifies the content on the master and intelligently copies only the data to speed up the copy cycle.
- Test function checks the USB and CF/SD flash media quality and read/write speed.
- Fast, reliable, convenient and cost-effective to operate, FlashMAX duplicators offer an easy and efficient platform to make multiple copies of your data.

"FlashMAX duplicators are the first duplicators on the market that implement asynchronous copy without data and memory size limitation. With our exclusive and unique SOTA Version 2 Technology, real time copy and compare function can achieve a higher efficiency level," says William Lee, Product Manager at ILY Enterprise, Inc. "Thanks to its revolutionary compact ergonomic design, our customers can now easily insert and remove flash media, and get more done in less time."
